

D₂O Viscosity

Values are from the approximation [1]:

$$\lg(\eta) = 757.9 \cdot \left(\frac{1}{T + 273.15} - \frac{1}{304.6} \right)$$

η : Viscosity [mPa s]

T : Temperature [°C]

T °C	η mPa s	T °C	\square mPa s						
-	-	26	1.110	51	0.708	76	0.481	101	0.345
